

2019 HRP MONITORING FRAMEWORK

Below is monitoring framework for 2018 HRP. Please provide updated cluster objectives, activities and indicators with data disaggregation model as needed, with track changes to OCHA (minhee@un.org) by Friday, 28 September. There is no need to provide the numbers of needs, baseline and target until the vetting process has finalized.

Cluster Objectives and Indicators Health and Nutrition

HEALTH AND NUTRITION CLUSTER OBJECTIVE 1: Ensure the availability, accessibility, acceptability and quality of essential lifesaving health services to the most vulnerable communities in Gaza and West Bank/EJ, including through health system strengthening, preparedness and community resilience building.			Relates to Strategic Objective # 2	
OUTCOME INDICATOR		IN NEED	BASELINE	TARGET
# of most vulnerable people in West Bank and Gaza accessing quality life-saving health interventions by type of service, including nutrition, maternal and child health, reproductive health, mental health, health care for elderly, and rehabilitation services for people with disabilities (PWD)				
ACTIVITY	INDICATOR	IN NEED	BASELINE	TARGET
Scale-up life and limb-saving health services to patients suffering from conflict-related injuries through the provision of trauma care services across the trauma pathway in Gaza	# of casualties received trauma care # of surgeries conducted at the acute phase by emergency medical teams (EMTs) # of physiotherapy consultations conducted # of limb reconstruction interventions conducted			
Provide access to healthcare for the most vulnerable children under the age of 5, neonates and pregnant and lactating women through life sustaining interventions at the facility and community level and Minimal Initial Service Package (MISP)	# of neonates receiving quality health and nutrition services # of < 5 children receiving targeted health and nutritional interventions. # of pregnant lactating women received reproductive health service			
Respond to the needs of the most vulnerable people by ensuring that they have access to essential primary healthcare in the West Bank and access to essential secondary level in Gaza	# of patients who received essential secondary care services in Gaza (medications provided/prescribed, diagnostic procedures, medical interventions including dialysis). # of people with access to primary healthcare services in the West Bank (outpatient consultations, NCDs, antenatal care, reproductive health).			

HEALTH AND NUTRITION CLUSTER OBJECTIVE 1: Ensure the availability, accessibility, acceptability and quality of essential lifesaving health services to the most vulnerable communities in Gaza and West Bank/EJ, including through health system strengthening, preparedness and community resilience building.

Relates to Strategic Objective # 2

- # of patients benefitted from essential health services powered from alternative emergency source(s)
- # of health departments and primary healthcare facilities benefitted from alternative energy source(s)
- # of outreach consultations conducted for people with disability who have no access to healthcare in the oPt
- # of acutely vulnerable boys, girls, men and women receiving mental health and psychosocial support (cross reference with Protection Cluster)

Enhance preparedness within the health sector to better deal with sudden onset events, such as heightened conflict and disease outbreak, through stockpiling, life-saving training, and enhanced coordination and communication in the oPt

- # of health facilities which have emergency preparedness plan
- # communities/CBO received preparedness training
- # of Health Cluster partners contributing to the joint health emergency preparedness plan
- # of affected people benefitted from prepositioned supplies within the first 24 hours of an emergency
- # of health workers received training on lifesaving interventions

HEALTH AND NUTRITION CLUSTER OBJECTIVE 2: Strengthen health coordination, information and health protection, with an emphasis on advocacy for the right to health, to improve the effectiveness of lifesaving health response for most vulnerable people.

Relates to Strategic Objective # 1

OUTCOME INDICATOR	IN NEED	BASELINE	TARGET	
# of patients and carers living in identified vulnerable communities' patients accessing health facilities in West Bank and Gaza have better preparedness to cope with impact of current and future crisis				
ACTIVITY	INDICATOR	IN NEED	BASELINE	TARGET

Document, monitor and advocate for universal health coverage and right to health of the affected people, including access to specialised health services requiring permits and prohibition of attacks on health (in coordination with Protection Cluster)

- # of patients benefitting from referral to non-MoH facilities disaggregated by age/sex.
- #partners actively documenting attacks of health care

HEALTH AND NUTRITION CLUSTER OBJECTIVE 2: Strengthen health coordination, information and health protection, with an emphasis on advocacy for the right to health, to improve the effectiveness of lifesaving health response for most vulnerable people.

Relates to Strategic Objective # 1

Strengthen health sector coordination and health # of health and nutrition cluster partners report information systems to improve the effectiveness of improvement in coordination and information life-saving health response for people in need, with an through the CCPM (cluster coordination emphasis on enhancing protection and increasing performance monitoring) access for health across the oPt

of local NGOs included in the HRP with self-led projects
