## Data on casualties

The figures below represent the number of Palestinians and Israelis who were killed or injured since 2008 in the occupied Palestinian territory (oPt) and Israel in the context of the occupation and conflict. The large number of civilian casualties has required various types of interventions by humanitarian actors, with many incidents raising concerns over violation of international law and lack of accountability.

Click, tap or hover over the charts to interact with the data; you can apply filters by time, area, context and affiliation of the casualties.
